2012

Increase the value of your energy dollar!

When you waste electricity you're throwing away money and everything you could have bought with it.

Saving energy saves you money!

COMMON AIR LEAKS

 Air Leaking into the house

 Air leaking out of the house

Have you tightened up your home?

Have you heard of a home energy audit? Your cooperative experts can meet with you to recommend money saving, energy efficient improvements. Some improvements may even qualify for rebates, conservation incentives or low-interest loans.

Your home assessment report will suggest energy saving opportunities and outline energy saving goals. You may even find that it includes some simple, low cost and no cost ideas. From there, you can select which of the energy saving ideas you want to implement.

Members are taking action across our region. Our economy has served as a signal to make changes in our lives that can save us money.

Find out how little changes add up by taking the free online home tour today. Go to www.TogetherWeSave.com; click on the house to begin.

One of the areas where your neighbors are conserving is in their awareness of energy use, where small changes make big impacts!

ELECTRICITY:
What's it worth to you?
