

If you've hesitated to purchase satellite internet because of data caps, the wait is over.

It's true — Viasat has launched unlimited data Viasat Internet plans for the first time ever! We think unlimited data plans are the future of satellite internet for everyone. While we've launched unlimited service plans in select areas for now, we're planning to offer these types of service plans in more areas across the U.S. and beyond in the very near future.

[What can you do with an unlimited data plan?](#)

Anything you routinely use the internet for. Banking. Shopping. Homework. Streaming music and video. Downloading files. Social media. News, sports, weather. Everything you love – more of it.

[Who is it for?](#)

Viasat Internet is a great choice for people who don't have cable where they live. It will be an upgrade for your family if you've been stuck with slow DSL or a local wireless service.

[What are the different types of unlimited data plans?](#)

In some areas, we're offering three types of unlimited data plans. The main differences between these plans are speed and video streaming quality. Here are the details:

Bronze 12

- Download speeds up to 12 Mbps / Upload speeds up to 3 Mbps
- Video Streaming at small screen quality, optimized for 360p

GOOD FOR: Smaller households that don't use many connected devices; people who mostly tend to stream videos on their phone or tablet. Think more YouTube than Netflix.

NOT IDEAL FOR: Households that stream video on large-screen TVs; people who stream most of their shows or cord cutters who value high definition quality; households with more than a few connected devices running at the same time.

Silver 25

- Download speeds up to 25 Mbps / Upload speeds up to 3 Mbps
- Video streaming at DVD quality definition, optimized for 480p

GOOD FOR: Families with many connected devices; people who don't mind watching shows in DVD quality and tend to watch on laptops, tablets, or small TVs.

NOT IDEAL FOR: Film buffs who prefer their shows in HD quality.

Gold 30

- Download speeds up to 30 Mbps / Upload speeds up to 3 Mbps
- Video streaming at high definition, optimized for 720p

GOOD FOR: Everyone! Families with many connected devices; people who want the best quality regardless of the device they use; people who watch video on big-screen TVs.

NOT IDEAL FOR: People who want to watch shows in 4K definition.
